No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    DB seq length: 0

Perfect score:
     Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      DB seq length: 0

TISSUE SPECIFICITY: Expressed in a variety of human tiss including kidney, skeletal muscle, lung and placenta.
SIMILARITY: Contains 1 FERM domain.
SIMILARITY: Belongs to the protein-tyrosine phosphatase Non-receptor class subfamily.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     2472

placenta and liver.

SIMILARITY: BELONGS TO THE RECEPTOR CLASS OF THE PROTEIN-TYPE PROSPHATASE FAMILY.

SIMILARITY: Contains 3 immunoglobulin-like C2-type domain.

SIMILARITY: Contains 8 fibronectin type III domains.

SIMILARITY: Contains 2 protein-tyrosine phosphatase domains.
